

Parth Tripathi

Frontend Developer

parthtripathimail@gmail.com

linkedin.com/in/parthtripathi21 — github.com/parthtripathi21

Technical Skills

Languages: Python, JavaScript, SQL

Frontend: React, Tailwind CSS, Framer Motion

Backend: FastAPI, Node, Express.js

Database: PostgreSQL, MySQL

Tools: Git, GitHub, VS Code, Figma, ChatGPT

Projects

EcoVision [Live]

React — Tailwind CSS — Chart.js

Developed an interactive **ecological footprint calculator** that transforms lifestyle inputs into meaningful sustainability insights through **real-time analysis** and **interactive visualizations**. Designed a responsive, mobile-first interface with reusable components and intuitive data presentation, making complex environmental metrics easier to understand and compare.

LocalSkillHub [GitHub]

React — FastAPI — PostgreSQL

Designed a **full-stack service marketplace** connecting customers with local professionals through a scalable client-server architecture. Built reusable frontend components, integrated **RESTful APIs**, and implemented efficient PostgreSQL data management to support listing creation, editing and service discovery while maintaining a responsive user experience.

Developer Portfolio [Live]

React — Tailwind CSS — Framer Motion

Designed and deployed a **personal developer portfolio** to showcase projects, certifications, technical skills and live demonstrations. Focused on **responsive layouts**, smooth animations, reusable UI components, SEO-friendly metadata and performance optimization to create a professional online presence across devices.

Progeny (Team Project) [Live]

Python — FastAPI — Deep Learning

Collaborated on an **AI-powered plant disease detection system** for early crop disease identification using deep learning and computer vision. Developed **FastAPI backend services** for model inference, integrated prediction APIs with the frontend and contributed to model training and deployment workflows for a seamless end-to-end solution.

Experience

Artificial Intelligence Intern

YBI Foundation — 2025

Trained machine learning models for **electricity demand prediction** using Python while applying data preprocessing, visualization and regression techniques to improve forecasting accuracy.

Web Development Intern

Mainflow Services & Technologies — 2024

Built **responsive web interfaces** and reusable frontend components while following modern web development practices and clean UI principles.

Education

Government Engineering College Ajmer

2022 – 2026

Bachelor of Technology (Information Technology)

CGPA: **9.31 / 10**

Certifications

2026: Electronic Arts Software Engineering Job Simulation (Forage), Deloitte Technology Job Simulation (Forage)

2025: AWS APAC Solutions Architecture Virtual Experience (Forage), The Complete Web Development Bootcamp (Udemy)
